

DATA SOURCE ATTRIBUTION NOTICE

The VERGO Platform integrates data from third parties and documents provided by Users. Use of the reports is subject, in addition to VERGO's Terms and Conditions, to the licensing conditions of the source right holders.

1. Cadastral data — ANCPI

1.1. Method of access used

VERGO obtains land identification information through two channels, neither of which involves access to restricted databases:

a) **documents provided by the User** — land book extracts (*extrase de carte funciară*), plans, graphic boundary delineations, uploaded by the holder entitled to transmit them; b) **ad hoc consultation of the public portal** made available by the National Agency for Cadastre and Land Registration (ANCPI), within the limits of normal use of a public service.

1.2. Attribution notice

Displayed in every report that uses information originating from ANCPI sources:

Data produced by ANCPI — www.geoportal.gov.ro

1.3. Conditions assumed by VERGO

- VERGO assumes full responsibility for how the information is used and for the results derived from it;
- VERGO **does not suggest** the existence of an official status, an institutional relationship, an approval, or a partnership with ANCPI;
- re-utilisation does not distort the original meaning of the information.

1.4. Documents provided by Users

Land book extracts and other official documents are not protected by copyright, being official acts. VERGO processes them solely on the basis of the User's mandate, with automatic removal of personal identifiers and without retaining the original file.

2. OpenStreetMap

Attribution notice:

Share-alike clause — mandatory architectural measures: The ODbL requires that any **derivative database** distributed publicly be licensed under the same licence. The generated reports generally constitute derived products (*produced works*), distributable under simple attribution.

- OSM layers are kept **separate** from VERGO's proprietary database;
- the database resulting from the processing of OSM data is not distributed to, or made available to, third parties;
- the separation is technically documented, so that it can be demonstrated.

3. National Power Grid (SEN) and generation projects

VERGO's own processing based on public data, dataset version: 30.06.2023

VERGO is not affiliated with grid operators or regulatory authorities. Information on connection capacities is indicative and changes frequently.

4. Administrative-territorial boundaries

Own processing based on public data; county boundaries: geoBoundaries (www.geoboundaries.org), CC BY 4.0

The representations in the report are indicative and do not replace the urban planning certificate (*certificat de urbanism*).

5. Global Solar Atlas and Global Wind Atlas

Attribution notice:

Global Solar Atlas 2.0, a free web application developed and operated by Solargis s.r.o. on behalf of the World Bank Group, using Solargis data and funded by ESMAP. www.globalsolaratlas.info — CC BY 4.0

Global Wind Atlas 3, a free web application developed, owned and operated by the Technical University of Denmark (DTU), in partnership with the World Bank Group, using Vortex data and funded by ESMAP. www.globalwindatlas.info — CC BY 4.0

The data are modelled; VERGO has processed them (clipping for Romania, on-site interpolation).

6. SoilGrids (ISRIC)

Attribution notice:

SoilGrids 2.0 — ISRIC World Soil Information, CC BY 4.0

7. ANAR, ANANP, ROMATSA and the P100-1/2013 code

Attribution notice:

Own processing based on public information from the Romanian Waters National Administration (ANAR) (flood hazard maps), the National Agency for Protected Natural Areas (ANANP), ROMATSA (aeronautical restrictions), the seismic zoning map from the P100-1/2013 code, and public data on archaeological sites.

VERGO is not affiliated with these entities.

8. Other sources

Source	Licence / basis	Mandatory notice	Restrictions	Last verified
Digital terrain model (slope)	public data	—	—	24.09.2026

9. VERGO's proprietary data

The layers, classifications, criteria, thresholds, weightings and aggregated results developed by VERGO are the exclusive property of VERGO HUB S.R.L. and benefit from the database maker's *sui generis* right protection (Directive 96/9/EC on the legal protection of databases; Law no. 8/1996 on copyright and related rights).

10. Reporting a licensing issue

Right holders who consider that their data are being used outside the licensing conditions may send a notice to office@vergo.ro, indicating the source and the basis for the claim. VERGO reviews it within 15 business days at the latest and, if the notice is well founded, suspends use of the layer pending clarification.
